E. BANNED SUBSTANCES

No substances shall be placed into the sanitary sewer system which will create a combustible, gaseous, explosive or inflammable condition nor shall any substances or objects be placed or discharged into the system which will not dissolve and which will thus cause an obstruction and clogging within the system. No petroleum products shall be placed or discharged into the system. No storm water or surface water drain shall be connected with the sanitary sewer system nor shall any storm or surface water be otherwise introduced into the system.

F. SEWER LINES

A sewer service pipe shall not be laid in the same trench with a water pipe.

If a governmental agency requires an inspection of the customer's plumbing, the Utility shall not connect the customer's service pipe until it has received notice from the inspection agency certifying that the customer's plumbing is satisfactory. When necessary to move or relocate facilities, the cost will be paid by the party or parties requesting such relocation.

Any customers ultimately connected under this arrangement shall be charged according to the utility's current approved rates filed with the Public Service Commission.

For purposes of this provision the term "prospective customer" shall mean any person, firm or corporation which expresses an intent to become an ultimate user or customer of the utility at the time of the connection inspection charge.

G. SEWER FAILURE

The utility is responsible for the maintenance of that portion of the service line installed by the Utility and the customer is responsible for the maintenance of that portion installed by the customer.
